# 1. INTRODUCTION

---

The historic passage of the Patient Protection and Affordable Care Act (PPACA) has called on non-profit hospitals to increase their accountability to the communities they serve. PPACA creates a new Internal Revenue Code Section 501(r) clarifying certain responsibilities for tax-exempt hospitals. Although tax exempt hospitals have long been required to disclose their community benefits, PPACA adds several new requirements.

Under the new code, tax-exempt hospitals need to assess community health needs and develop and implement plans to meet those needs. Section 501(r) requires a tax-exempt hospital to conduct a community health needs assessment every 3 years. The community needs assessment must take into account input from persons who represent the broad interests of the community served, especially those of public health, and must be made available to the public.

The PPACA requires non-profit hospitals to conduct a community health needs assessment, widely publicize assessment results, and adopt an implementation strategy to meet needs identified by the assessment.

According to the new hospital regulations, an implementation strategy that addresses how a hospital plans to meet EACH of the health care needs identified through the community health improvement planning process MUST be written and adopted by the governing body of the organization. An explanation for any assessment findings not addressed must also be included.

No organization alone can address the health needs identified by the community needs assessment. Collaboration at multiple levels throughout the organization and across the community will be required to improve community health. We have begun to foster the coalitions and engagement with municipalities and community leaders that will be required to achieve success. The hospital will assign a staff person to monitor and report the performance measures included in the implementation plan. The health of the communities will improve as we implement the multi-year plan. Strategic planning will be an ongoing effort among hospital administration, NCDHD staff, and the public health system.

## **HOSPITAL PLAN COMMUNICATION STRATEGY**

The planned dissemination of the CHNA report includes the Antelope Memorial Hospital website and printed copies available upon request from Antelope Memorial Hospital. Jack Green, Administrator will personally present the survey results to the Hospital Medical Staff, Board of Trustees and the Antelope County Healthcare Foundation.

## 2. DESCRIPTION OF HOSPITAL SERVICES AND SERVICE AREA

---

Antelope Memorial Hospital is a not-for-profit critical access hospital located in the northeast Nebraska community of Neligh, population 1,600. The hospital serves approximately 6,500 residents in the eight rural communities of Neligh, Brunswick, Clearwater, Elgin, Oakdale, Orchard, Royal and part of Tilden. Antelope Memorial Hospital offers a full range of acute and preventive health care services, including acute inpatient care, restorative/ rehabilitative (swing bed) care, an emergency services department, home healthcare, same-day surgery, state-of-the-art radiology, ultrasound, and mammography services, laboratory services, physical, speech, and occupational therapy, wellness, dietary consultations, and a wide range of specialty outpatient clinics and services. Antelope Memorial Hospital has served Neligh and Antelope County since 1952.

Economically, Antelope Memorial Hospital is a major impact in the area. As the largest employer in the county, AMH employs 165 employees, with a payroll of over 5.4 million and an economic impact on the area in excess of \$21 million.

Antelope Memorial Hospital's mission is "to make a difference in people's lives through excellent patient care". The hospital's vision embraces its greatest assets – its medical staff and employees. Compassion, empathy and professional expertise are epitomized by the wonderful care the staff delivers to AMH patients and their families.

Antelope Memorial Hospital is affiliated with the Heartland Health Network and Mid America Health Alliance. The Mid America Health Alliance provides Antelope Memorial with education and access to the University of Nebraska Medical Center as a resource. The Heartland Health Network provides education and assists to improve quality of services and health status of our communities, while encouraging autonomy as a stand-alone facility.

In 2012, Antelope Memorial Hospital admitted 317 patients, treated 1,081 patients in emergency services, and had over 20,000 outpatient visits. AMH Family Practice had 10,931 visits in 2012. The current staffing of Antelope Memorial Hospital and Clinics includes 105 full time equivalents, 2 family practice physicians, 2 nurse practitioners, and one physician assistant. Over 30 physicians are on courtesy staff. There is one other critical access hospital in the county (Tilden Community Hospital).

### 3. EXISTING COMMUNITY PUBLIC HEALTH RESOURCES

---

Other community health services and resources available in Antelope County include 2 intermediate certified ambulance services staffed by 4 paramedics, 25 EMT, and 1 first responder. There are two assisted living facilities, (The Willows licensed for 32 beds, Prairie View licensed for 26 beds) and one nursing home, (70 beds, of which 16 are designated Alzheimer) in the county. Primary care services include AMH Family Practice Clinics in Neligh, Clearwater, Elgin, and Tilden, Orchard Medical Clinic, Elgin Veterans' Medical Clinic, Tilden Community Hospital Medical Clinic, and Neligh Clinic (a private physician office). There are 2 sites that provide dental services and 2 full time equivalent dentists. There are no mental health facilities in the county (most mental health counseling within the county would be provided by clergy in community churches).

The eight towns, (Neligh, Clearwater, Oakdale, Orchard, Royal, Brunswick, Elgin, and part of Tilden), that comprise the Antelope County service area have resources already in place to address the health needs of the population. Antelope Memorial Hospital recognizes the strengths of each community in the service area, and will work to support and complement those organizations that are also working to improve the health and well-being of the population.

Local organizations dedicated to serving low-income and medically underserved populations provide food, emergency financial assistance, social support, and some access to medical, dental, vision, hearing, and mental health care. These organizations include, but are not limited to:

Neligh Senior Citizen Center  
Elgin Community Center  
Oakdale Community Center

Neligh Ministerial Association  
Antelope County Food Pantry

Antelope Memorial Hospital staff participates in fundraising events in the community. The Hospital and Clinic staff participate in the annual Bubby's Race, which raises approximately \$6,000 per year for cancer treatment and equipment in Antelope and Holt Counties, and the Antelope County Foundation Golf Tournament, which raises approximately \$20,000 annually to be used for healthcare needs within the county.

Each year, Antelope Memorial Hospital assists with the efforts of the Antelope County Healthcare Foundation in hosting an annual golf tournament. Proceeds are earmarked to help support the health care excellence of Antelope County. In recent years, the foundation has gifted monies toward Antelope Memorial Hospital (for needed equipment) as well as the Orchard, Clearwater, Elgin and Neligh Emergency Medical Systems.

Antelope Memorial Hospital is actively involved in promoting health and wellness in Antelope County through several avenues. Alternating each week, educational articles and paid ads (2 columns x 7 inches) are submitted to six area newspapers to include Neligh, Elgin, Clearwater, Orchard, Tilden and Petersburg. Paid ads of the clinic schedules for special physicians who travel to AMH each month are run monthly. These specialty clinics, held at AMH, allow these services to be obtained locally by area

residents – without extensive travel elsewhere. AMH also runs radio ads Monday – Friday on three area radio stations, promoting health awareness topics and services in-house. In addition, AMH has a community newsletter sent to over 5,000 area residents several times a year. It promotes topics for health awareness as well as AMH services and updates.

Beginning in April 2013, AMH opened its doors to Weight Watchers meetings being held in-house. Already, the response from the public has been excellent. The goals of Weight Watchers are to promote healthy eating and exercise habits while striving to reach and maintain a healthy weight. Many AMH employees have also been actively involved and have successfully begun shedding excess pounds. It has been very uplifting and a morale booster for these participants. It has inspired their fellow co-workers to join them in being more health conscious.

Antelope Memorial Hospital advertises and promotes in its monthly in-house employee newsletters upcoming bloodmobiles being held in Neligh. In addition, two AMH employees actively volunteer to help host the bloodmobiles.

AMH Nurse Practitioner, Sharon Gossman, was awarded the Helping Hands Award at the 2013 Nebraska Nurse Practitioner Conference, held in February. She was cited as being a mentor and role model to many rural NPs.

This spring, a “Nutrition” presentation was scheduled to be delivered to the public by Ashley Krohn, PA-C, at the Elgin Senior Center during lunch.

In December 2010, remodeling plans were initiated in the original portion of Antelope Memorial Hospital, built in 1952. The remodeling was completed in phases. The new Cardiac/Pulmonary Rehab, Physical Therapy and Wellness Centers were completed in the fall of 2012. This has been a tremendous service for promoting and enhancing the cardiac, pulmonary, physical therapy and wellness services offered at AMH. Aesthetically pleasing and modernized, these areas have and continue to attract more awareness and enthusiasm about managing health challenges, preventative care and healthy choices and awareness. The Physical Therapy Center also includes a new therapy pool, allowing for an aquatic rehab program for the appropriate patients.

The AMH Wellness Center offers a variety of opportunities for the public and employees to exercise and shape up. The center is open to the public on weekdays. Employees have the opportunity to exercise there at no charge before or after work. The Strength Training and Cardio (S.T.A.C.) class was offered in early 2013 and additional classes will be offered again in the future on an ongoing basis. Walk-at-Lunch was offered a day in April to employees. During National Hospital Week in May, the wellness staff presented “Being ‘Wellthy’ at Work” talks several times that week. Jayne Funk, RN, presented “Healthy Eating Tips” several times. Wellness also plans to offer “The Walking Competition” early this summer.

In recent years, AMH Wellness has offered the “Biggest and Best Loser” Contest for weight loss, beginning in January - April. This year, a total of 115 individuals participated. Many participants also enjoyed the S.T.A.C. during the contest. This contest has served to promote health awareness via healthy eating and exercise habits. Again, many AMH employees and/or their spouses participated and assisted with the contest. It has proven to be a life changing experience for many individuals. In addition,

participants have been inspiring to their spouses, children, grandchildren and other family members, having a ripple-effect in promoting healthy choices.

The Wellness Department also offered mini-screenings during February at a local grocery store. They offered BMIs, hand-outs and tri-folds about the new AMH Wellness Center, promoting exercise and health awareness.

The AMH Physical Therapy Department continues to offer ImPACT to area athletes. ImPACT is a computer test developed to help clinicians evaluate an athlete's recovery following a concussion. Each athlete is given a baseline test during the pre-season. It is repeated and compared to the baseline scores in the event of head trauma. This comparison helps to diagnose and manage the concussion while helping to determine the athlete's ability to return to play safely.

In January 2013, a new digitalized mammography unit was installed in the AMH Radiology Department. The unit is a low-dose x-ray system for examining breasts – to aid in the early detection and diagnosis of breast disease in women. In April 2013, AMH was awarded a three-year term of accreditation in mammography by the American College of Radiology. The ACR gold seal of accreditation represents the highest level of image quality and patient safety for mammograms. Officially qualifying for the accreditation validates the professional expertise and image quality found at AMH. Having an in-house unit at AMH allows mammography exams to be offered during extended hours and more frequently during the week. Radio ads have also been run this spring by AMH promoting the service and the importance of routine mammograms.

Carol Anderson, geriatric nurse practitioner, is the director of the AMH Cardiac/Pulmonary Rehab and Diabetes Education. These departments offer many services to empower patients to recover from and/or manage cardiac, pulmonary and diabetic issues. Anderson is also an instructor through UNMC at the Northeast Community College Campus. Currently, nursing students come to AMH as part of their rural rotation.

Antelope Memorial Hospital and AMH Family Practice Clinics have promoted "You Are in Charge of Your Health", via radio ads and news articles. Six-pack coolers have been given to all patients to encourage them to bring all of their medications to each hospital and/or clinic visit. This allows the health care provider to have a current list of the patient's medications at each visit.

## RESOURCE LISTING

### Assisted Living Facilities

The Willows  
806 S Street  
Neligh, NE 68756  
402-887-9059

Prairie View  
100 S Street  
Tilden, NE 68781  
402-368-2250

### Chiropractic

Neligh Chiropractic & Acupuncture  
324 Main Street  
Neligh, NE 68756  
402-887-4878

Creekwood Chiropractic Clinic  
413 Main Street

## 4. PLAN OWNERSHIP

---

### **Background Data to Support Hospital and Local Public Health Joint Ownership in the Community Health Improvement Plan**

There are many reasons why, in our third process of community needs assessment and planning, it was logical for the North Central District Health Department to partner with the eleven district hospitals to complete a joint Community Health Improvement Plan (CHIP). The major reason is to improve overall community health through the assistance of multiple partners. Additional reasons for collaboration exist: eight of our eleven local hospitals are now required to complete both a Community Health Needs Assessment and Community Health Improvement Plan to meet IRS requirements to maintain their non-profit status. Those hospitals are:

Antelope Memorial Hospital, Neligh, NE (Antelope County)  
Avera Creighton Hospital, Creighton, NE (Knox County)  
Avera Saint Anthony's Hospital, O'Neill, NE (Holt County)  
Osmond General Hospital, Osmond, NE (Pierce County)  
Plainview Community Hospital, Plainview, NE (Pierce County)  
Tilden Community Hospital, Tilden, NE (Antelope County)  
Niobrara Valley Hospital, Lynch, NE (Boyd County)  
West Holt Memorial Hospital, Atkinson, NE (Holt County)

While the other three hospitals are not required to complete a Community Health Needs Assessment or Community Health Improvement Plan, working with them to create community-specific plans will help to make NCDHD's overall Community Health Improvement Plan more meaningful. Those hospitals are:

Brown County Hospital, Ainsworth, NE (Brown County)  
Cherry County Hospital, Valentine, NE (Cherry County)  
Rock County Hospital, Bassett, NE (Brown County)

Some of the major drivers toward a new, higher level of collaboration between the health department and the hospital include:

#### **1. Nebraska State Statutes**

Nebraska Statutes under 71-1628.04 provide guidance on the roles public health departments must play and provide the following four of ten required elements which fit into the public health role in the Community Health Improvement Plan.

*...Each local public health department shall include the essential elements in carrying out the core public health functions to the extent applicable within its geographically defined community and to the extent funds are available. The essential elements include, but are not limited to, (a) monitoring health status to identify community health problems, (b) diagnosing*

and investigating health problems and health hazards in the community, (c) informing, educating, and empowering people about health issues, (d) mobilizing community partnerships to identify and solve health problems...

## 2. A History of Working Together on Previous Community Improvement Plans

The North Central Community Care Partnership (NCCCP) set the groundwork for public health assessment in our nine counties by completing a Community Health Needs Assessment and developing a community improvement plan in 1999. In that year, NCCCP worked collaboratively with many public health partners, including our local hospitals, and contracted with Tripp Umbach & Associates, Inc. to complete a random sample community health needs assessment. Since then, North Central District Health Department (NCDHD) has been using the MAPP process, and/or components thereof, to meet the requirements of the Nebraska Statute. The NCCCP and NCDHD have worked to involve all the hospitals in its service area in this process since 1999. Thus, we have three assessment processes and have benchmarks to measure against.

## 3. The Patient Protection and Affordable Care Act Impact on Hospitals

The historic passage of the Patient Protection and Affordable Care Act (PPACA) has called on non-profit hospitals to increase their accountability to the communities they serve. PPACA creates a new Internal Revenue Code Section 501(r) clarifying certain responsibilities for tax-exempt hospitals. Although tax exempt hospitals have long been required to disclose their community benefits, PPACA adds several new requirements.

Section 501(r) requires a tax-exempt hospital to:

- Conduct a community health needs assessment every 3 years
  - The assessment must take into account input from persons who represent the broad interests of the community served, especially those of public health
- Develop an implementation plan and strategy that addresses how a hospital plans to meet EACH of the health care needs identified by the assessment
  - This plan must be adopted by the governing body of the organization, and must include an explanation for any assessment findings not being addressed in the plan
- Widely publicize assessment results

As mentioned earlier, this requirement affects eight of the eleven hospitals in the NCDHD service area.

## 4. Redefinition of Hospital Community Benefit

Hospitals have been providing community benefits for many years in a variety of ways. In return, hospitals receive a variety of local, state, and federal tax exemptions. The activities listed under “community benefit” are reported on the hospital’s IRS 990 report.

Community benefit has now been defined by the Internal Revenue Service (IRS) as “the promotion of health for a class of persons sufficiently large so the community as a whole benefits.” Simply put, community benefit is composed of programs and services designed to address identified needs and improve community health. To qualify as community benefit, initiatives must respond to an identified community need and meet at least one of the following criteria:

- Improve access to healthcare services
- Enhance health of the community
- Advance medical or health knowledge
- Relieve or reduce the burden of government or other community efforts

## 5. Public Health Accreditation Requirements

In July of 2011, the Public Health Accreditation Board (PHAB) released the first public health standards for the launch of national public health department accreditation. All local health departments (LHDs) must have completed a Community Health Assessment (CHA) and Community Health Improvement Plan (CHIP). PHAB Version 1.0 has standards that require the LHD to:

- Participate in or conduct a collaborative process resulting in a comprehensive community health assessment
- Collect and maintain reliable, comparable and valid data
- Conduct a process to develop community health improvement plan
- Produce a community health improvement plan as a result of the community health improvement process
- Implement elements and strategies of the health improvement plan in partnership with others
- Analyze public health data to identify health problems that affect the public’s health
- Provide and use the results of the health data analysis to develop recommendations regarding public health policy, processes, programs or interventions

## 5. PLANNING PROCESS

---

### **MAPP: The evidenced-based process used for the CHNA and CHIP**

North Central District Health Department has been responding to the need for community assessments using the Mobilizing for Action through Planning and Partnership (MAPP) process. The MAPP process was developed by and is recommended for community assessment by the National Association of City and County Health Officials (NACCHO) and Centers for Disease Control (CDC). MAPP was also recommended by the Nebraska Rural Health Association in its *“Community Health Assessment*

*Collaborative Preliminary recommendations for Nebraska's community, nonprofit hospitals to comply with new requirements for tax exempt status enacted by the Patient Protection and Affordable Care Act" (September of 2011).*

MAPP was chosen, in part, because the process allows for input from parties who represent broad interests in the communities. Input from diverse sectors involved in public health, including medically underserved, low-income, minority populations and individuals from diverse age groups, was obtained through surveys and targeted focus groups by way of invitations to community leaders and agencies.

Many of the 11 hospitals in this nine-county area have participated with the previous assessments. During this third iteration of the MAPP process, NCDHD served as the lead agency with support from all hospitals through both personnel and financial resources.

MAPP involves gathering together multiple community stakeholders for a shared assessment, strategic planning, and implementation process. The MAPP cycle has well defined steps and processes to capture community input and move a community or organization to make positive changes.

## 6. COMMUNITY HEALTH NEEDS ASSESSMENT METHODOLOGY

### Gathering Data

In looking at the plan process template below, it can be seen that data gathering is the first step in completing the CHNA. Data gathering was accomplished using the four MAPP model assessments and included both primary and secondary data sources.

The Community Health Needs Assessment (CHNA) has been completed three times since 1999, with the most recent assessment completed by October of 2012. The most recent assessment findings are available online for public review at [www.ncdhd.ne.gov](http://www.ncdhd.ne.gov).

The table below can serve as a summary of the process used in planning the joint CHNA and joint CHIP for the NCDHD, 11 area hospitals, and other district partners. As you can see, the plan involves three major themes: the Community Health Needs Assessment (CHNA), the Community Health Improvement Plan (CHIP) and the Plan Implementation. Various activities that are part of the overall process appear under each section.

It is important to note that Community Engagement is an overarching concept encompassing the majority of the CHNA and CHIP process and will be discussed under each area. Community Engagement was also a major part of the data gathering process.

Community Health/Needs Assessment						Community Health Improvement Plan				Plan Implementation
Data Gathering		Community Engagement								
Secondary Data	Primary Data	Data Analysis	Prioritize Issues	Team Communications	Public Communications	Service Gap Analysis	Review of Evidence Based Interventions	Develop Action Plan	Develop Monitoring Plan	Performance Management
				Communications						

The first assessment is the Community Themes and Strengths Assessment which is a subjective look at how the community views their health to capture the perceived needs of the community. This assessment ranks high for community involvement. This step was completed through focus groups in the counties, as well as telephone surveys conducted by the state of Nebraska. The data for this assessment was collected over a six-month period and included 500 written and/or 500 telephone surveys.

The second assessment is the Forces of Change assessment. This assessment is done in one town hall-style meeting to capture the community's perception of current trends affecting the health of the community.

North Central Community Care Partnership (NCCCP) conducted a "Forces of Change" session. NCCCP members brainstormed what forces of change exist outside of the control of individuals in their communities. These are the things that affect the local health system of the community. They looked at social, economic, political, technological, environmental, scientific, legal and ethical issues. The group discussed the trends, events and factors that affect the community and identified a significant number of forces of change:

- Insurance issues
- Health reform
- Lack of medical specialists
- Lack of understanding rural issues
- Population isolation
- Loss of jobs
- Technology gaps

- Pipeline
- Water issues
- Government regulations
- Change in moral values
- Air quality issues
- Noise pollution
- Skin cancer
- Grant and budget cuts
- Lack of affordable quality housing
- Lack of activities for youth
- Increasing elderly population
- Migration of gangs and increasing drug issues
- Language barriers
- Outside corporations buying land
- Community apathy
- Increase in natural disasters
- Cost of gasoline
- Merging of school systems
- Decreasing retirement resources
- Higher taxes
- Disposable society
- Increase of on-line education
- Loss of social skills
- Cyber bullying
- Decreasing sense of accountability
- Lack of trust and respect
- Lack of dollars to improve structure of older buildings

The third assessment is the Community Health Status Assessment. This assessment provides data from the federal government (such as Census data), state (such as vital statistic data), and NCDHD as a district health department (such as immunization rates for the district or parental views on substance abuse). Data gathered for compilation came from many sources, including national surveys such as the Behavioral Risk Factor Surveillance System, Youth Risk Behavior Surveillance System, US Census, and Youth Protective Factor Survey. In total there are around 30 sources of data: community profiles, access to health care/quality of life, mental health, physical health, health risk factors, social programs, and crime. Data collected represents every age group from prenatal to elderly.

### **Community Involvement**

The MAPP process currently underway is the most thorough assessment to date, and involves the most participants to date with more than 100 individuals participating thus far. This number does not include the 1,000 individuals surveyed or those who took part in focus groups.

### **Community Health Needs Assessment**

To accomplish the health and quality of life improvement goal, community health surveys were distributed to 5,000 randomly selected households (proportionate to county population) in north-central Nebraska. This household health survey reveals information about the health and risk behaviors of the residents of the study area that is not available from other sources. It also allows the NCDHD to look at sub-groups within the area to identify groups with the greatest need. The survey was initially sent to selected households via two mailings of postcards and provided the option for selected participants to take the survey online. A second set of mailings was sent to the group of randomly selected households. This mailing provided a hard-copy survey to complete with return postage paid, and excluded those households that had already completed the survey online. 1,774 completed surveys were recorded for an overall response rate of 35%.

### **MAPP process adapted from previous iterations**

In the past, NCDHD completed community health needs assessments, community health improvement plans and NCDHD strategic plans every five years. The first cycle was completed in 2000 and the second cycle in 2006. This planning process has been essential in driving forward the work of the department and the strategic plans have been actively and regularly reported on to the governing board of NCDHD. This third MAPP process differs significantly from the first two processes in many ways. While NCDHD was due for a repeat of the three tiered process in 2012, the process will now occur every three years instead of every five years. This will require the department to become more efficient at the gathering of data for the Community Health Needs Assessment (CHNA). Previously, the entire cost of the CHNA has been borne by the NCDHD. For the current planning process, the local hospitals have shared in the planning and cost. While NCDHD has always worked with district hospitals as one of many planning partners on past CHIP efforts, this is the first time hospitals shared a responsibility with NCDHD for the development and implementation of the CHIP plans. In the past, the primary ownership of the CHIP rested with the NCDHD. Ownership of the plan is now shared between district hospitals and NCDHD, with NCDHD maintaining primary ownership and serving as a collaborative partner and technical consultant.

### **Special knowledge or expertise for MAPP and CHIP processes**

Roger Wiese, the NCDHD Executive Director, has participated in a national effort to strengthen and transform public health through Collaboration for a New Century in Public Health: Turning Point Collaborative. NCCCP has been recognized by the National Association of City and County Health Officials (NACCHO) for the collaborative role they have played in the advancement of public health assessments. NCCCP was part of 41 communities awarded support from NACCHO, the Robert Wood Johnson Foundation and the W.K. Kellogg Foundation to develop a Turning Point: A New Collaboration In Public Health. This process was completed in March, 2003.

## 7. COMMUNITY DESCRIPTION AND DEMOGRAPHIC DATA

---

### 7A. OVERALL DISTRICT DEMOGRAPHICS

The community of North Central District Health Department is located in a very rural area in the north-central region of Nebraska. Our community outreaches throughout a 14,455 square mile area and includes the nine counties of Antelope, Boyd, Brown, Cherry, Holt, Keya Paha, Knox, Pierce and Rock.

There are an estimated 45,135 people living in this north-central Nebraska community, allowing this area population to commune as 3.1 people per square mile. The median age of the people in our community is 45.6 years, and consists of mostly White at 88.3%, followed by 8.4% Hispanic or Latino and 4.3% Black or African American.

The median household income of our rural community is \$37,938 and the per capita income is \$28,482. The educational attainment level of the people here is at 88.5% as high school graduates for the percent of persons age 25+ and the percent of persons with less than a 9th grade education is at 7.7% in this community.

Other interesting facts:

- The land area of the district comprises one-fifth (19%) of the land area of Nebraska, while their population is 2.5% of the state population.
- Like much of rural Nebraska, the population in the district is declining, 11.4% in the last decade, and it is aging.
- Nearly one-third of the health district population is in the 45-64 age demographic, compared to 25% for Nebraska.
- One in five persons in the district is over the age 65 (NCDHD, 20%; NE, 13%).
- Just under half (49%) of the health district population is under the age 45, compared to nearly two-thirds (61%) for Nebraska.

## 8. DATA ANALYSIS, PUBLIC HEALTH DATA AND INDICATORS

---

North Central District Health Department contracted with Dr. Joseph Nitzke, PhD of Ionia Research, to review and publish an analysis of the district's data. The "Report Analysis and Comments Public Health Data (PHAN)" document has been prepared for NCDHD using Public Health Agencies of Nebraska (PHAN) data as the primary source. The intent is to summarize trends in data and differences between the counties served by NCDHD and the rest of the state of Nebraska.

The observations within the report are based on the application of formulas to evaluate "dependent crude rates/ratios" (Crude Rate Analysis), comparing the NCDHD district rates or percentages for an indicator with those of the state to determine whether or not those differences are significant. These observations are also placed in the context of other reports where appropriate, including the Behavioral Risk Factor Surveillance System (BRFSS 2007-2008), the 2005 Data Book produced by the Nebraska Health Information Project, prior assessments, and state profiles.

## 9. COMMUNITY INVOLVEMENT

---

Involvement of community members from several entities was key to the success of the overall process and plan development. An effort was made to involve community members during each step of the planning process. Entities that were invited to meetings included hospitals, physicians, dentists, community action agencies, law enforcement, social services, mental health providers, senior care services, schools, media, city/county officials, representatives of minority populations, clergy, Nebraska Department of Health and Human Services and other community-based services. The community members were contacted via mail, email and telephone prior to each step of the process to invite and encourage their participation in the planning process.

Organizations that participated in the CHIP meeting, community focus group meetings and strategic planning sessions are listed below. These entities had one or more participants in the process.

- Ainsworth Community Schools
- Alegent Creighton Health/Plainview
- Antelope County Supervisors
- Antelope Memorial Hospital
- AseraCare
- Avera Creighton Hospital
- Avera St. Anthony's Hospital
- Avera St. Anthony's Mission Services
- Boyd County Ambulance
- Boyd County Sheriff's Department
- Bright Horizons

- Brown County Hospital
- Building Blocks and Counseling Enrichment
- Cherry County Hospital
- Cherry County Sheriff's Department
- Central Nebraska Community Services
- Counseling & Enrichment Center
- Creighton Community School
- Dietician
- Early Development Network
- Emmanuel Lutheran Church – Tilden
- Faith Regional Health Services
- Heartland Counseling
- Jacy's Grace Home Health
- Mayor of O'Neill
- North Central Community Cares Partnership
- North Central District Health Department
- NCDHD Board of Health members
- Nebraska Department of Health and Human Services
- Nebraska State Patrol
- Niobrara Valley Hospital
- O'Neill Police Department
- O'Neill Public Schools
- Osmond General Hospital
- Pierce County Commissioner
- Prairie View Assisted Living
- Region 24 Emergency Management
- Region 4 Behavioral Health System
- Rock County Hospital
- Santee Health Clinic
- St. Mary's High School
- Tilden Community Hospital
- Trinity Lutheran Church
- UNL Extension in the Brown-Keya Paha-Rock counties
- Valentine Dental Clinic
- West Holt Memorial Hospital
- Community members / by invite

## 10. COMMUNITY HEALTH IMPROVEMENT PLANNING

---

### 10A. OCTOBER 2012 MEETING

A Community Health Improvement Planning meeting was held on October 12, 2012 at the O'Neill Country Club. The purpose of this meeting was to pull together a diverse group of individuals from several entities representative of our nine county district to review the data for the district, which included the community health needs assessment and secondary data from multiple assessment sources. Participants referred back to the data that was presented (see appendix) as they engaged in the strategic planning process. Dr. Joe Nitzke of Ionia Research provided an executive summary of the community health assessment and the secondary data. Deb Burnight of Burnight Facilitated Resources facilitated the process of identifying focus areas and priority issues, and guided the strategic planning sessions in the afternoon.

Community members were invited to this planning meeting via email through a list developed in the NCDHD database. Entities that attended included: NCDHD, NCCCP, NCDHD Board of Health members, UNL Extension in the BKR counties, Avera St. Anthony's Hospital, Alegent Creighton Health/Plainview, Region 4 Behavioral Health System, CNCS, Osmond General Hospital, Heartland Counseling, Region 24 Emergency Management, Antelope Memorial Hospital, Early Development Network, Brown County Hospital, Niobrara Valley Hospital, Bright Horizons, O'Neill Public Schools, Tilden Community Hospital, Nebraska State Patrol, Antelope County Supervisors, West Holt Memorial Hospital, Building Blocks and Counseling Enrichment, Faith Regional Health Services, AseraCare, Nebraska Department of Health and Human Services, and Jacy's Grace Home Health.

The agenda for the CHIP meeting was:

- Registration
- Welcome & introductions
- Presentation of executive summary and secondary data
- Focus areas determined
- Priorities developed for each focus area
- Strategic planning group sessions
- Adjourn

Following the time for networking, registration and breakfast, Roger Wiese, Executive Director for North Central District Health Department welcomed the participants to the session and provided background information about the CHIP process. Participants also introduced themselves and the agencies that they represented. Joe Nitzke was introduced and provided an overview of the community health assessment executive summary, which was emailed to invitees prior to the meeting, as well as secondary data that included selected data from community surveys, PHAN, BRFSS and Vital Statistics. Participants were

provided with a worksheet so that during the presentation they could list major health problems or high-risk behaviors that were noticed and how the data to show these problems/behaviors were an issue.

After the data set was presented (see appendix), the entire group of participants worked together listing the issues they felt to be most important. Each table would decide upon the top five most critical priorities based on the data presented, the conversations they had been having throughout the day and the focus areas. A “sticky wall” was utilized during the process and every table brought their priorities to the “sticky wall”. Once all priorities were on the wall, the group was able to identify common issues. All of the common issues were then placed together on the wall.

Participants at each table talked through the priorities listed on the wall and determined how they would prioritize the issues that were listed. Prioritization was based on issues that are doable/achievable, issues that address a critical need, resource availability – both human and financial, and those that could provide a community focus. Each participant was given dot stickers and asked to place their dots on the issues that were of the most concern to them.

A discussion was held about how many strategic areas the CHIP group could manage effectively. The participants then decided to choose five (5) focus areas around which to mobilize collaborative action over the next three years (with the understanding that other issues may be able to feed into the priority issues) or may be chosen in three years when the next planning process occurs.

## **IDENTIFIED PRIORITY NEEDS**

In general, the CHIP group felt that it was important to not lose any of the priority issues, too many areas may dilute the entire process and make it less effective. The group determined that four broad focus areas would be adequate to cover the major health problems and high-risk behaviors discussed, and several priorities would be listed within each focus area. The identified community health needs led to the creation of the following focus areas (priorities related to each focus area are listed below the respective heading):

### **Access to Care / Cancer Prevention and Education**

- Access to affordable health care
- Health care for all
- Flu vaccination (general)
- Rx assistance
- Immigrant population
- Dental care
- Vision
- Colon cancer
- Colorectal screening
- Prostate screening
- Need increased mammography screening
- Preventative screening across all cancers

### **Behavioral Health – Mental Health and Substance Abuse**

- Stress management
- Lack of mental health services and payment
- Mental health access
- Mental health (providers, awareness, low reimbursement)
- Tobacco use
- Alcohol use across lifespan
- Alcohol (Youth)
- Substance abuse – alcohol (binge), prescription drugs, tobacco
- Binge drinking

### **Chronic Disease, Obesity, and Related Health Concerns**

- Cardiovascular, heart disease, stroke
- Cardio, CPR, response time, education, confusion
- Lack of exercise
- Weight issues (BMI)
- Over-weight & obesity

### **Environment & Safety**

- Bike helmet usage
- Farm / agriculture safety
- Texting and driving
- Child safety seats
- Radon
- Domestic violence and child abuse
- Environmental issues in community

Once the focus areas were decided upon, individuals selected a focus area that was of interest to them and the larger group then divided up into focus area groups. Each table focused on their topic of interest and associated priorities. The groups listed current resources to address the priorities, completed a gap analysis to identify where there were gaps and listed the benefits of addressing the priorities.

Prior to adjourning, it was discussed that community focus group meetings would be held in December and January to determine if there were other issues community members were aware of that needed to be addressed in the strategic planning sessions.

### **NEEDS RECOGNIZED BUT NOT ADDRESSED**

Although NCDHD recognizes the importance of all needs identified by the community, NCDHD will not directly design strategies for all issues in the community health needs assessment. These needs, while important to the health system and the community, were not chosen based on our community

prioritization. Prioritizing examined the severity of the problem and the health system's ability to impact the issue.

The following will not be addressed due to the low priority status compared to chosen goals:

- Youth consumption of energy drinks
- Depreciated family values and morals
- Safety in schools
- Youth internet access
- Foodborne illness
- Opposing legalization of marijuana

The health system does not feel adequate resources, funding, or data are available to take on the following projects at this time:

- Elderly prescription education, medication management
- Emergency Protective Custody (EPC) issues
- Insurance concerns- premium affordability, Medicaid/ Medicare funds being cut
- Elderly long-term care financial burden
- Lack of safe, affordable housing

If the health system is made aware of other programs and resources in the community to address these issues, we will continue to provide our support to effectively meet the community health needs.

## **10B. NOVEMBER 2012 – JANUARY 2013 COUNTY FOCUS GROUP MEETINGS**

The next step in the planning process was to conduct county focus group meetings. Ten (10) meetings were held between November 2012 and January 2013. Invitations were sent to attendees of the October 2012 meeting, along with other community members from each specific county. A written invitation was sent, followed by emails and phone calls.

The agenda for the county focus group meetings was:

- Introductions

- Past planning meetings
- Executive summary of Community Health Assessment Survey
- Secondary Data Executive Summary
- Community Health Improvement Plan
- Priorities
- Next Steps

County meetings were held on the following dates:

- Knox County – November 26, 2012
- Holt County – O’Neill – November 27, 2012
- Antelope County – Tilden – December 17, 2012
- Antelope County – Neligh – December 17, 2012
- Cherry County – December 18, 2012
- Brown County – December 18, 2012
- Boyd County - December 19, 2012
- Holt County – Atkinson – December 19, 2012
- Pierce County – December 20, 2012
- Rock County – January 10, 2013

Introductions were completed at each county focus group meeting. Roger Wiese, Executive Director with North Central District Health Department discussed the past planning efforts and how NCDHD had gotten to the point of conducting county focus group meetings. An executive summary and secondary data summary were presented and discussed. Information that was developed at the October 2012 CHIP meeting was presented and attendees from each county discussed other topics they felt were evident in their communities. These additions and comments were placed into documents and a summary was developed to use in future planning efforts. See appendix for county focus group meeting notes.

### **10C. FEBRUARY – MARCH 2013 STRATEGIC PLANNING SESSIONS**

Following the community health improvement planning meeting held in October 2012 and county focus group meetings held from November 2012 through January 2013, CHIP strategic planning sessions were held at the Blarney Stone restaurant on February 8 and March 7, 2013.

The agenda for these meetings included the following items:

1. Introductions
2. Overview
  - a) History and purpose of community health assessment
  - b) Summary of planning process thus far
  - c) Development of SMART goals leading to objectives and action planning
3. Next steps
  - a) Ongoing planning, creating objectives and action items

During these meetings, participants were updated with the process so far. This included a recap of the October CHIP meeting, during which participants chose areas of focus; followed by a recap of county focus group meetings. The February 8 meeting addressed the focus areas of Chronic Disease, Obesity, and Related Health Concerns and Behavioral Health – Substance Abuse and Mental Health. The meeting on March 7 addressed the focus areas of Access to Care / Cancer Prevention and Education and Environment and Safety. Data sheets with state and district data and Healthy People 2020 Objectives were provided for each focus area. Each group reviewed the data and began the process of forming goals and objectives for the public health system. The workgroups were asked to articulate goals, determine the baseline of data to support the need for the goal, and develop SMART (Specific, Measureable, Achievable, Realistic, Time-Bound) objectives. The challenge for each group was to consider the focus area in terms of the entire nine (9) counties rather than setting goals and objectives specific to a county or facility. Participants in each focus area discussed how they would choose the priority issues, agreeing to participate in subsequent meetings to accomplish this and further develop key strategies and activities. These meetings will be accomplished via Telehealth, telephone conference calls and/or face to face meetings. Workgroups will accomplish their work independently of the large group, with each group determining the frequency they will meet to keep the plan moving forward. Additional work completed by these groups to fine-tune objectives and establish action items will address policy change. Workgroups are encouraged to meet at least quarterly to continue planning and progress updates. The workgroups will be led by NCDHD staff and community partners. Participants are encouraged to invite other key individuals that may be interested in the focus area and bring additional perspective.

Work groups at the February and March strategic planning sessions were established by asking participants to choose their focus area of interest. Work group members, along with goals and objectives identified for each focus area are listed in the Implementation Plan section of this document.

## **GAP ANALYSIS**

### **Strengths Identified in the NCDHD Community Include:**

The greatest strength, and a driving force of the NCDHD area, is the partnership that exists between the hospitals in the region. Improving community health for all is important for achieving better lifestyles and beyond. A solid infrastructure is already in place to obtain the goals set forth in the Improvement Plan, and shared responsibilities between the entities in the community create a strong network of support.

### **Gaps Identified in the NCDHD Community Include:**

The biggest community health issue our nine county district faces is the lack of available providers. As mentioned before, nine out of eleven counties in the district are Medically Underserved Areas (MUA). The Health Resources and Services Administration of the U.S Department of Health and Human Services give MUA designation when the Index of Medical Underservice (IMU) score is 62.0 or less. IMU uses the following four variables to create a score: ratio of primary medical care physicians per 1,000 population, infant mortality rate, percentage of the population with incomes below the poverty level, and percentage of the population age 65 or over. In addition, the following table demonstrates the State of

Nebraska's designations for Family Practice shortages as well as shortages for specialties in the NCDHD district.

The lack of consistent high quality relevant data is a challenge. In some areas there is good data, but in other areas it is not collected at all, or it is not collected in a way that is useable. Stigma concerning mental health issues will also be an obstacle to overcome, especially in the small town communities of the district. The expansive geographical nature of the district presents a challenge in achieving coordination between providers and providing adequate service to community members.

Nebraska Rural Health Advisory Commission State Designated Shortage Areas- Medical and Mental Health NCDHD Counties						
County Name	Family Practice	General Internal Medicine	General Pediatrics	OB/GYN	General Surgery	Psychiatry & Mental Health
Antelope	X	X	X	X		X
Boyd			X	X	X	X
Brown	X		X	X	X	X
Cherry	X	X	X	X		X
Holt	X	X	X	X	X	X
Keya Paha	X	X	X	X	X	X
Knox	X	X	X			X
Pierce	X	X	X	X		X
Rock		X	X	X	X	X

**Table1.1** "blank" indicates county is not a shortage for that specialty, "X" indicates shortage area for that specialty

## 10D. NEXT STEPS

The Health Department has established individual teams to develop goals and implement strategies for each priority. Team leaders from the Health Department will be identified and commit to continued service on each of the priority area teams. Each team leader is responsible for:

- Organizing a team which includes both field professionals and representative community members.
- Guiding the work of the team, including development of goals, logic model and work plan.
- Establishing metrics including measurable outcomes indicators.
- Assuring work is coordinated with other priority teams.
- Communicating appropriately with the community at large.

## 11. IMPLEMENTATION PLAN

**FOCUS AREA:** Access to Care / Cancer Prevention & Education

### WORK GROUP TEAM MEMBERS

NAME:	ORGANIZATION:
Bunner, Stephanie	North Central District Health Department
Cork, Ron	Avera St. Anthony's Hospital
Green, Jack	Antelope Memorial Hospital
Hart, Peggy	North Central District Health Department
Johnson, Geri	Brown County Hospital
Kuester-Burtwistle, Tracy	Faith Regional Health Services
Miller, Shannon	Avera St. Anthony's Hospital
Schulte, Mark	Avera Creighton Hospital
Sorensen, Shannon	Brown County Hospital
Steen, Matthew	Faith Regional Health Services

**GOAL 1:** Increase the number of primary care physicians serving the NCDHD area.

<b>Objective 1:</b>	Increase the percentage of medical providers that utilize telemedicine options.			
<b>Baseline Data:</b>	In NCDHD there are 1,206 persons per physician, compared to 434 persons per physician in Nebraska. Shortages include: 9 counties short in obstetrics/gynecology & psychiatrists; 8 short in pediatrics; 7 short in family practice & internal medicine; 6 short in general surgery; and 5 short in occupational therapy & pharmacy. Telemedicine is available in all hospitals, but is greatly underutilized.			
<b>Measurable Outcome:</b>	By 2016, there will be a 15% increase in the number of physicians that utilize telemedicine options for patient treatment.			
Programs/Resources that are currently Committed to this Priority:	Current Budget:	Programs/Resources that will be Committed to this Priority:	Future Expected Budget:	Responsible Parties:
Patients are able to consult with the nephrologist for monthly follow-ups. Telemedicine is also used for trauma consultation and transfer.	Monthly fee: \$100	Work with tele-health program administrator at UNMC to establish future tele-health clinics.	Monthly fee \$100 (Specialty clinics, possibly cost of otoscope and stethoscope)	AMH
Action Item:	Resources:		Responsibility:	Timeline:
<b>Comments/Progress:</b>				

<b>Objective 2:</b>	Secure an adequate level of reimbursement for telemedicine utilization.			
<b>Baseline Data:</b>	In NCDHD there are 1,206 persons per physician, compared to 434 persons per physician in Nebraska. Shortages include: 9 counties short in obstetrics/gynecology & psychiatrists; 8 short in pediatrics; 7 short in family practice & internal medicine; 6 short in general surgery; and 5 short in occupational therapy & pharmacy. Telemedicine is available in all hospitals, but is greatly underutilized.			
<b>Measurable Outcome:</b>				
Programs/Resources that are currently Committed to this Priority:	Current Budget:	Programs/Resources that will be Committed to this Priority:	Future Expected Budget:	Responsible Parties:
Charge \$45 per tele-health visit	Loss of approximately 50% on all tele-health visits	AMH plans to watch for changes in the DHHS Centers for Medicare and Medicaid Services allowable site facility fee. Our reimbursement as of today is 50% of fee from Medicaid (\$22.50) and 55% of fee from Medicare (\$24.75)	\$800	AMH
Action Item:		Resources:	Responsibility:	Timeline:
<b>Comments/Progress:</b>				

<b>GOAL 2:</b>	Increase the number of employers that offer incentives for investment in the employee's health in the NCDHD area.
----------------	---

<b>Objective 1:</b>	Increase the percentage of employers that offer worksite wellness programs.			
<b>Baseline Data:</b>	Unable to locate baseline data.			
<b>Measurable Outcome:</b>	By 2016, there will be a 25% increase in the number of employers that offer worksite wellness programs.			
Programs/Resources that are currently Committed to this Priority:	Current Budget:	Programs/Resources that will be Committed to this Priority:	Future Expected Budget:	Responsible Parties:
We have made our wellness room accessible to all employees 24 hours a day. We offer seasonal exercise classes, host employee	\$20,000 for wellness coordinator  Approximately	Continue to encourage employees to use the wellness area, initiate an obesity program and	Budget one full-time person to oversee the Wellness Program.	AMH

physical fitness competitions and employee/public weight loss challenges.  AMH just completed remodeling for a new wellness center. This area will be open for employees to use without charge.	\$1,000 for teacher wages and equipment	continue with diabetic training. Plus, AMH hopes to begin Healthy Wellness incentives for employees to reward healthy living. Our plan is to attempt this when new health insurance policies become in effect in January 2014.  AMH also plans to investigate the possibility of offering a Wellness Program to employers of surrounding businesses. This initiative includes exploring the possibility of a "Wellness Clinic Time" specific to area businesses.		
<b>Action Item:</b>		<b>Resources:</b>	<b>Responsibility:</b>	<b>Timeline:</b>
<b>Comments/Progress:</b>				

<b>GOAL 3:</b>	Increase the health literacy of residents in the NCDHD area.
----------------	--

<b>Objective 1:</b>	Increase the proportion of persons who report their health care provider always gives them easy-to-understand instructions about what to do to take care of their illness or health conditions.			
<b>Baseline Data:</b>	60% of persons reported that their health care providers always explained things so they could understand them in 2007			
<b>Measurable Outcome:</b>	By 2016, 70% of persons will self-report that their health care provider always gives them easy-to-understand instructions about what to do to take care of their illness or health conditions.			
<b>Programs/Resources that are currently Committed to this Priority:</b>	<b>Current Budget:</b>	<b>Programs/Resources that will be Committed to this Priority:</b>	<b>Future Expected Budget:</b>	<b>Responsible Parties:</b>
AMH Family Practice	The hours are	AMH would like to	Use resources of	AMH

<p>currently offers “A.M. Walk-in Clinic Hours” – to decrease the number of non-emergent patients in the ER. The clinics are held from 8 – 9 a.m. M-F and are advertised in six area newspapers and have been advertised on the radio also – in the past.</p> <p>Practitioners educate patients on proper use of Emergency Department and what steps to take appropriately. Patients are given educational materials that explain their illness/disease on a 5th grade level. This material can also be translated to Spanish. The educational material instructs (in non-medical terminology) when a patient needs to be in contact with a health care provider.</p>	<p>include in the mid-level practitioner’s salary. <b>GOAL 6:</b>	Increase the percentage of children and adults who see a dentist yearly for preventive care in the NCDHD area.
----------------	--

<b>Objective 1:</b>	Increase the proportion of low-income children and adolescents who received any
---------------------	---

	preventive dental service during the past year.			
<b>Baseline Data:</b>	Persons in the lowest income bracket, under \$15,000, were more likely to report never having visited a dentist (27.9% vs. 3.7% of those in the highest income bracket). About 55% of respondents to the community health survey with incomes below \$15,000 per year said they had visited the dentist within the last year compared to 76% of respondents earning \$40,000 or more per year.			
<b>Measurable Outcome:</b>	By 2016, 65% of residents in NCDHD with incomes below \$15,000 per year will have received preventative dental services during the past year.

<b>Objective 3:</b>	Increase the number of households testing for specified hazardous living conditions: radon, unsafe water, toxic chemicals, lead and mold.			
<b>Baseline Data:</b>	19.4% of households tested for radon. 58% of households have never had their water supply tested (private well, city/village water, or rural water system). NCDHD has a significantly higher percentage of children with elevated blood levels when compared to the state. No specific data exists for mold and other toxic chemicals.			
<b>Measurable Outcome:</b>	By 2016, 25% of households in NCDHD will have tested for at least two hazardous conditions.

<b>Objective 2:</b>	Reduce non-fatal physical assault injuries.
<b>Baseline Data:</b>	According to the framework for the Nebraska 2020 Healthy People Objectives, from 1999-2003 the average number of Nebraskan's admitted or treated in hospitals for assault was 3,544. Healthy People 2020 reports 514.1 emergency department nationwide visits for nonfatal physical assault injuries per 100,000 population occurred in 2008 (age adjusted to the year 2000 standard population).

*Choi

<b>Objective 3:</b>	Reduce the number of people injured as a result of distracted driving.			
<b>Baseline Data:</b>	Insufficient data available.			
<b>Measurable Outcome:</b>	According to DHHS from 2005 to 2009, distracted driving resulted in 173 deaths, 14,000 injuries. The Nebraska Office of Highway Safety states, in 2011, there were 3515 drivers involved in distracted driving crashes. From the framework for Nebraska's 2020 Healthy People Objectives, motor vehicle crashes were the leading cause of injury death and the fourth leading cause of injury hospital discharge in Nebraska with an average of 238 deaths and 11,832 discharges from 2000 to 2003.

<b>Objective 4:</b>	Reduce the number of injuries of people over 65 years old, in their home environment.			
<b>Baseline Data:</b>	According to the DHHS Nebraska Injury Report from 2004 to 2008, unintentional falls were the leading cause of hospitalizations and emergency department visits due to injury among Nebraskans, and the third leading cause of injury death. From 1999 to 2003, the death rate due to falls in NCDHD area was 4.7/100,000 population. Falls were the leading cause of injury hospital discharges with an age adjusted rate of 1,801/100,000 from 1999-2003 in the NCDHD area.			

*CADTHARC Falls*

<b>Measurable Outcome:</b>	By 2016, reduce the mortality rate due to falls to 3.7/100,000 and fall related morbidity hospital discharges 1,700/100,000 respectively.

## 12.A NEEDS ASSESSMENT DATA

### Needs Assessment Data

North Central District Health Department

Ionia Research

Joseph Nitzke  
10/12/2012

### Basic Demographics

### Households w/ Children <18 (percent by age)

In NCDHD (PHAN, Census)

69% of Households are Family Households

26% of Households have children under 18

NCDHD 2012 Survey

70% of Households are Family Households

22% of Households have children under 18

### Demographics: Age x List

#### Age Demographics

Mailing List vs. Responses

### Demographics: Age (2)

#### Population Distribution (selected age groups)

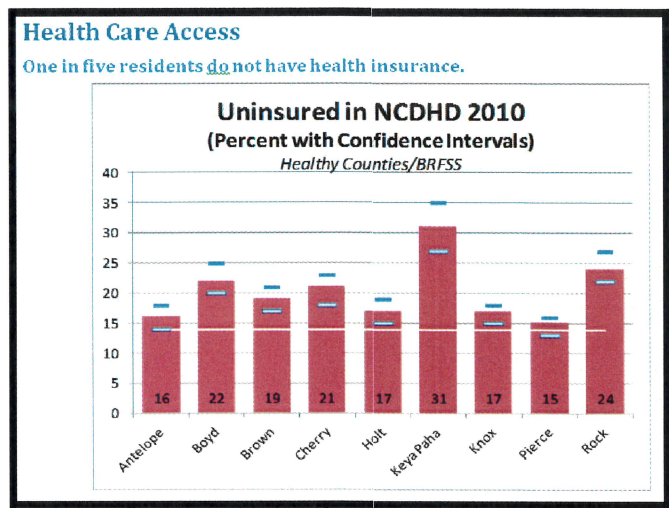

### Distribution by County

#### Population by County

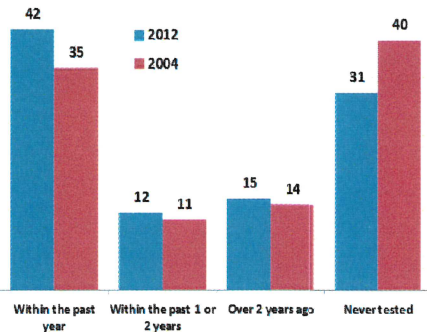

## Cardiovascular (Heart Problems)

Family History: 60%, slight increase since 2004 (56%).

The proportion tested within the past two years has increased from 47% in 2004 to 54% in 2012.

Recent Diagnosis: 12% in 2012 have been told by a health professional they have heart problems.<sup>1</sup>

Heart Problems: Pct. Tested

<sup>1</sup> Though the (112.6/100,000) due coronary disease is not significantly higher than the state rate of 91.7, that rate is higher than the HP2020 target of 100.8 deaths per 100,000 population.

## High Blood Pressure

Percent diagnosed with high blood pressure

- 30% in 2004 Survey
- 26% in 2009 PHAN/BRFSS for NCDHD
- 34% in 2012 Survey
- 29% in Nebraska, 2011

Of those 62% with a family history, 80% have been told by a HP they have HBP.

The HP2020 target for high blood pressure was revised for 2020 to 26.9%.

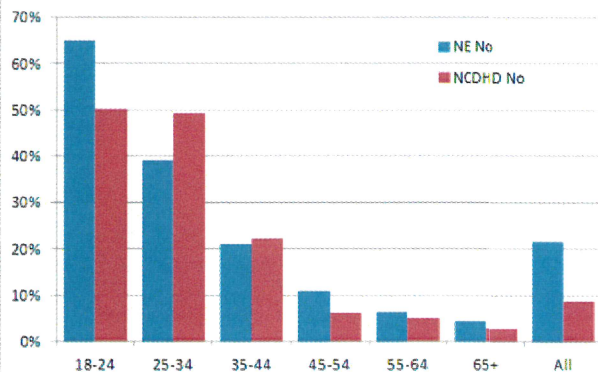

Tested for High Blood Pressure (%)

The rate of deaths due to stroke in the HD was significantly higher than that of Nebraska (HD, 47.6; NE, 42.9). The HP 2020 target is 33.8 deaths per 100,000 population.

## Cholesterol

Adults who have never had cholesterol checked

## Survey Response (cont.)

2004: 64% were checked within the past two years.

2012: 80% of respondents had their cholesterol checked within the past two years.

(The proportion of those never tested decreases with Age; increases with Education.)

## High Cholesterol BRFSS

Advised by HP, Of those tested, 30.8% of survey respondents were advised by a health professional that they have high cholesterol (2012 Survey).

2008 NCDHD BFRSS: 25.5%

2008 Nebraska: 32%

2010 Nebraska: 37%

NCDHD is very close to the HP2020 Goal for having cholesterol checked (To increase the proportion of adults aged 18 years and older who have had their blood cholesterol checked within the preceding 5 years to 82.1% from 74.6% (2008 benchmark).

## Weight

Nebraska: In 2002, 23% of Nebraskans were obese; in 2011 that proportion has increased to 28%.

In the 2004 Health District survey, the average BMI for HD respondents was 27.88; in 2012 the average increased to 28.44.

### 2012 Survey

Normal Weight: about one third (30.5%), a slight increase from 2004 (29.8%);

Overweight: three of ten (34.9%), compared to 42.4% in 2004; and

Obese: one third (33.7%) obese, compared to 27.8% in 2004.

In Nebraska, the prevalence of obesity has nearly doubled between 1995 (16.3%) and 2011 (28.4%).

HP 2020 Healthy Weight: 33.9%

HP 2020 Obesity: 30.6%

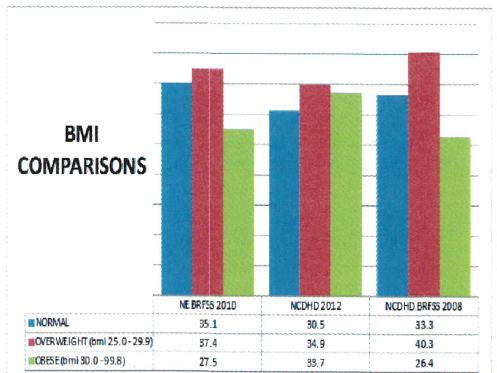

## Weight and Family History

About half (48.4%) of the respondents to the NCDHD survey reported a family history of being overweight. In 2004, 44%.

Of those with a family history, 85.9% are overweight/obese (32.8% overweight; 53.1% obese).

Of those who responded No, 46.5% are normal weight, 37.3% are overweight, and 15.2% are obese.

In practical terms, between 10-12,000 of the adults served by NCDHD would be categorized as obese.

## Current Weight Loss Attempts (Over the past two years)

One in five (19%) of respondents have been told by a health professional that they have obesity/weight problems. Of these, one in six (16%) is overweight, and four of five (82%) are obese.

Of all respondents, two-thirds (65%) are trying to lose weight, and 44% limit the fat in their diets *Often-Always*. In the 2004 study, 49% were trying to lose weight, and 33% limited the fat in their diets *Often-Always*.

Overweight: 70% of those overweight are trying to lose weight, 29% are not; 46% limit the fat in their diet *Often-Always*.

Obese: 89% are trying to lose weight, and 39% limit the fat in their diet *Often-Always*.

### HP2020

HP 2020 Healthy Weight: 33.9%

HP 2020 Obesity: 30.6%

### Youth and Weight (YRBS)

- 72% are at a Healthy Weight for their age.
- One in four (26%) are either overweight or at risk of being overweight.

Youth report that to control weight they have gone without eating for 24 hours or more (8.8%); 3% have taken pills, diet powders, or liquids to lose weight; and 2.2% reported that they vomited or took laxatives to lose weight or to keep from gaining weight.

## Diabetes

**Prevalence.** Nearly half (49.5%; 2004 = 46.8%) reported a family history of the disease. One in ten (11%) have been told by a health professional that they have diabetes.

Two thirds (70%) of the respondents were tested for diabetes within the past two years, while one in five (19%) have never been tested for diabetes.

The prevalence of diabetes in the HD is about the same as that for Nebraska. The rate for diabetes related deaths in the HD (78.6 per 100,000; NE is 81.2) is significantly lower than that of the state; however, both are about 20% above the 2020 HP goal of 65.8/100,000.

**Dental care.** An HP2020 Goal is to increase the proportion of persons with diagnosed diabetes who have at least an annual dental examination to 61.2%. In the 2012 survey, 63% of diabetic adults report having at least an annual dental exam.

**Eye Exam.** The HP2020 Goal is to increase the proportion of adults with diabetes who have an annual dilated eye examination to 58.7%; in the survey 70% of diabetic adults reported having an eye exam annually.

Other rates: hospitalization for diabetes in the HD is significantly lower than that of the state; the proportion of diabetics who have their blood pressure checked at least every two years is 95%.

## Exercise

75% report that they exercise in HD and in NE.

In the NCDHD survey the percent of adults *who have not exercised* decreased since 2004 (2004, 32.8% of respondents responded 'no' to the exercise question; 25% in 2012).

Conversely, 75% of respondents answered 'yes' to exercise in 2012, an increase from 67.2%.

For NCDHD respondents, exercise decreases with age, from 92% for the youngest level to 73% for the oldest demographic. Exercise increases with income.

Two-fifths (39%) exercise less than two times per week, which compares favorably to the 2004 response (43%). In 2012, one in four (24%) exercise five or more times per week.

The proportion of respondents whose exercise periods are more than 30 minutes has increased from 36% in 2004 to 39% in 2012.

103. Each week I exercise			104. When I exercise, I exercise for		
	2012 %	2004 %		2012 %	2004 %
Less than 1 time	15.4	9.2	Less than 20 minutes	31.9	31.8
1 or 2 times	24.0	33.8	20-29 minutes	28.8	32.5
3 or 4 times	36.9	31.8	30 minutes or more	39.4	35.7
5 or more times	23.7	25.3	Total	100	100
Total	100	100	System		

## Exercise

- One half (51%) are below the levels recommended by the CDC.
- One in eight (12%) meet or exceed the guidelines (2 hours 30 minutes per week, the threshold for moderate exercise);
- One in five (18%) are likely to meet the guidelines, depending on whether their exercise is moderate or vigorous (if it is vigorous, yes; if moderate, no).

## Exercise (cont.)

103. Each week I exercise \* 104. When I exercise, I exercise for Cross tabulation

103. Each week I exercise		104. When I exercise, I exercise for			Total
		Column 1 Less than 20 minutes	Column 2 20-29 minutes	Column 3 30 minutes or more	
Cell 1	Less than 1 time	9.8%	1.1%	0.7%	11.7%
Cell 2	1 or 2 times	10.6%	8.8%	5.6%	25.0%
Cell 3	3 or 4 times	8.0%	13.3%	17.3%	38.6%
Cell 4	5 or more times	3.1%	5.5%	16.1%	24.7%
Total (N)		363	330	456	1149

## Environment

### Pesticides: Inside the Home

One in four respondents (27.8%) used pesticides inside the home. Of those, chemicals were applied on average 5.59 days per year. The number was wide ranging, with a median of 2 days and a range of 1 through 190.

### Outside the Home

Half of the respondents (53.8%) reported applying chemicals in the yard. The average was about the same as indoors (4.52 days) as was the median (2 days). The range, however, was 1-365.

### Radon

A positive finding is that the percent who have their home tested for radon doubled between 2004 (9.6%) and 2012 (19.4%).

## Asthma

About one in eight (13.5%) have asthma.

- In the 2008 BRFSS report, the proportion of adults in the NCDHD ever diagnosed with asthma was 9.6%; 6.5% currently have this disease, according to the report.
- For Nebraska (BRFSS, 2010) a similar proportion were diagnosed with asthma (12.2%; CI 11.1-13.4).

The 2012 Survey asked if respondents had an illness or symptom caused by something in the air (indoors and outdoors).

## Water

About one third (29%) of households rely upon a private well for water, while half (52%) use city/village water. Overall, more than half (58%) report never having had their water tested.

Of those who rely on a private well, one-third (33%) have never had their water tested.

Of those with city/village water, 75% have never had their water tested (it is unclear if the city/village conducts testing on its own).

Over half of those who use a rural water system (56%) have never had their water tested.

## Tobacco

**Current Prevalence.** In the 2008 BRFSS report for the district, 17.8 % said they currently smoke cigarettes, either daily or on some days of the month. Among current smokers, 51.1% reported trying to quit smoking at least once in the past 12 months. Nearly one-half of men in the North Central District (48.4%) said they had ever used smokeless tobacco, while 29.8. % stated they currently use these tobacco products. This current rate of smokeless tobacco use is significantly higher than the statewide rate of 12.6%.

RWI County Health Rankings estimate the prevalence at just over 18%; of nearly 35,000 adults, 6,300 are current smokers.

### Current Smokers: 2012 Survey

For these respondents, only 7.2 percent are current smokers.

Of current smokers, two-thirds (67%) smoke some days or every day. Overall, the prevalence of smoking reported in the 2012 survey is lower than that reported in 2004. For example, in 2012, 13% of current smokers smoked more than a pack per day, which is down from the 25% reported in 2004.

In addition, 10.6% said they have ever used or tried any smokeless tobacco product; currently, only 2.4% use smokeless tobacco (in the 2004 survey, 7.7% were current users). In 2004 4.5% reported using other tobacco products (cigars, pipes, etc.), but in 2012 other tobacco usage decreased to 1.9%.

## Youth Tobacco Use (2010 YRBS)

One-third (35%) of youth have tried smoking, with males more likely to have smoked (39%) than females (30%).

About one in six (14%) currently smoke.

Of those, 8% considered themselves regular smokers (at least one per day for 30 days).

### Any Tobacco

A calculated variable for tobacco users (all tobacco products) from the NCDHD results shows that 8.6% of all respondents use some type of tobacco product. In 2004, 21.7% of the respondents used one or more forms of tobacco.

The pattern of usage by demographics is different than that for smoking. Unlike smoking, increasing age actually shows an increase in the proportion who use tobacco. The same is true of income and education. What this suggests is that other tobacco use morphs with age, so that those who once smoked may now be using smokeless tobacco, cigars, or pipes.

### Tobacco: Goals and Comment

For adults, the HP2020 goal is to reduce cigarette smoking to 12% from 20.6% in adults aged 18 years and older.

For NCDHD, the current prevalence of smoking is equal or greater than the benchmark identified in the cigarette goal; for smokeless tobacco it is equal or greater than the benchmark; and for cigar smoking it is nearly equal to the benchmark. Each of these goals, then, presents an opportunity for improvement.

## Alcohol Use

About half of the respondents drink alcohol (49.8%; 2004, 56.4%), and

One in five respondents (18.5%; 2004, 22.6%) have a family history of alcohol problems. In households reporting a family history of alcohol problems, about half (51%) report heavy drinking and 11.8% report binge drinking.

Two-thirds (Q82, 62%) drink infrequently, at most a few times per month, and the remaining third drink once per week (14.7%), a few days per week (18.3%), and daily (5.1%).

**Binge drinking:** Of all males responding to the 2012 survey, 10% reported binge drinking, while 3% of females reported binge drinking. Of all households, 9.4% reported binge drinking.

In the survey, the greatest differences are across age groups under 35, in which 12-17% of respondents reported binge drinking, compared to 5% for age 55-64 and 1% for 65+.

**Self-reported binge drinking across the district and across Nebraska is more prevalent than heavy drinking. Both binge and heavy drinking are more common in men (e.g. in the 2010 BRFSS: males, 25; females, 14%). In the 2008 BRFSS report for NCDHD, binge drinking in the past month was reported by 16.6% of adults in this district, with men (24.7%) significantly more likely than women (8.4%) to report this pattern of alcohol consumption.**

**Youth and Binge Drinking.** In the 2010 YRBS report, 11.5% of youth in the district had engaged in binge drinking (males, 12%; females, 10%; or, 23% of all 12<sup>th</sup> grade respondents). There is considerable separation for the district between that and the HP2020 goal to reduce the proportion of persons engaging in binge drinking during the past month to 8.5% from 9.4% during the past month in 2008.

**Focus Group** participants mentioned alcohol and alcohol treatment as one of their concerns.

They were concerned about youth and alcohol, and believe that youthful drinking is, in part, the product of few choices, most of which depend on having a school large enough that can offer activities.

Participants also cited the difficulties in getting alcohol treatment and social services, "It is too hard to get help for a family" in some of the communities. Other communities echoed that saying, "people not know about alcohol related services." They also expressed similar concerns about drug abuse, with some comments about specific communities, and that included abuse of prescription drugs.

**Ride w/a drinking driver.** The HP2020 goal is to reduce the proportion of adolescents who report that they rode, during the previous 30 days, with a driver who had been drinking alcohol to 25.5 percent. About 24% of NCDHD youth reported that they rode with a driver who had been drinking. (About one in five survey respondents (22%) reportedly rode with a driver who had been drinking.)

## Miscellaneous

### Gambling

In 2012, the proportion of 'gamblers' decreased from 37% in 2004 to 29% in 2012. Of the 394 who play the lottery/gamble, 1.3% reported that it caused problems, and 3% have tried to quit.

### Regular Eye Care

Over the six year period defined in the question, 49% of respondents reported regular eye check-ups once a year or less, and for another 28% regular eye exams are within a two-year span (77% within every two years). That is an increase from 2004 from 36% having a checkup at least once per year and 27% additional within the second year (63% cumulative)

In 2004, 11%, never had a regular eye exam; in 2012 that dropped to 5%.

Some of the improvements in vision care may be related to improvements in insurance coverage.

Less than half (45%) of respondents reported that their insurance does not cover regular eye care; that is a decrease from the 53% of the 2004 survey. Other changes in coverage occurred where insurance covers Some costs (2012, 29%; 2004, 19%) and Most costs (2012, 17%; 2004, 15%).

**Glaucoma Tests.** Though glaucoma tests are often part of regular eye exams, more than one in five of respondents (20%; 2004, 29%) report never having been tested for glaucoma. On the other hand, nearly half (48%; 2004, 37%) report being tested within the past year. Within the past two years, 5% of survey respondents have been diagnosed with glaucoma (2004, 8.6%).

## Women's Health

Of the women responding to the survey (average age, 60), 30% visit a gynecologist at least once each year (2004, 39.5%).

Regular Checkups Increase with Education, Income; Decrease with Age.

Never: 51.1%, 2012; 39.4%, 2004—Increases with Age, Decreases with Income and Education.

## Cervical Cancer

The HP2020 goal is to increase the proportion of women who receive a cervical cancer screening based on the most recent guidelines to 93% from 84.5% of women aged 21 to 65 years. The 2012 survey results (98.5%) appear to surpass that goal, as did the results from 2004 (96.5%).

In the HD, 75% of women surveyed in the 2008 BRFSS had a Pap test within the past three years. Using that benchmark would put NCDHD below the 93% target and even below the level reported for Nebraska in 2010 (80.2%).

## Mammogram Results

- For women 50+, 74.6% of survey respondents had a mammogram within the past two years (50-74 = 77%).

- For women 40+ in the HD, 73.1% of survey respondents have had a mammogram in the past two years.

The HP2020 goal, for women aged 50 to 74, is to increase the proportion of women who receive a breast cancer screening based on the most recent guidelines to 81.1% from 73.7% based on the most recent guidelines.

The HD proportions are comparable to the state rate and the national benchmark, but below the 81.1% target.

Note that the 2008 BRFSS report for the HD put the proportion for women 40+ at 63.5%, which was below the state percent and considerably below the target.

## Cancer Screening: Colonoscopy

Incidence of Colon Cancer  
2008 Rates by State and Region

Deaths from Colon Cancer  
2008 Rates by State and Region

**Death & Incidence rates.** There are no significant differences between the HD and the state of Nebraska in the rates of incidence or death; however, in comparison to other states, Nebraska rates in the top tier (highest rates) in each of those categories. In the percent screened, it ranks 39<sup>th</sup>.

## Testing

About half (45.9%) of the HD respondents have had either a colonoscopy or sigmoidoscopy, compared to 61.8% in Nebraska. (For those in the HD, all who had a Sigmoidoscopy also had a colonoscopy, thus 45.9%)

One in four (22.6%) in the HD have had an FOBT in the past 5 years; 15.3% in NE have had an FOBT within the past two years.

The proportion screened increases with increases in age, education, and income, both for the HD and for Nebraska.

### Colon Cancer Screening Goals

HP 2020 set a target of 70.5% for the proportion of adults aged 50 to 75 who receive a colorectal cancer screening (benchmark, 54.2%).

Although participation in colon cancer screenings in the health district has increased in recent years, it is significantly lower than that of the state (according to PHAN data). The most telling comparison within this survey is that 45.9% of the HD respondents have had either a colonoscopy or Sigmoidoscopy, compared to 61.8% in Nebraska, which as a state is lagging in screenings, and ahead in rates of incidence and death when compared to other states.

#### Notes: Barriers

In studies cited by the American Cancer Society:

- General lack of access to health care, often as a result of no health insurance.
- Inadequate communication by health care providers; i.e., the absence of a physician's recommendation for screening reduces the likelihood of screening among both insured and uninsured individuals.
- The differences in patient and provider testing preferences.
- Individuals with the lowest educational attainment and income levels, who have the highest colorectal cancer burden and would thus benefit most from cancer screening, have among the lowest colorectal cancer screening rates, even among insured populations.
- Personal barriers to screening include fear and embarrassment.

### Prostate Cancer

Of NCDHD respondents over 40, 57.4% have been tested for prostate cancer within the past two years; one-fourth (26%) have never been screened. That is an increase over 2004 (50.3%), when the percentage of those not screened was 34.6%.

Results for the HD are similar to those of Nebraska. Proportions increase with age and with education.

#### Screening for Prostate Cancer (40+)

### Maternal Child Health

In the 2004 survey, one-sixth (16.6%) of the female respondents reported being pregnant; in 2012 6.8% were pregnant. Of those, two-fifths (42%) were 19-24, and two-thirds were 25-34.

97% are seeing (or saw) a doctor while pregnant.

The average number of doctor visits during the pregnancy was 12.5.

33% (Question 64) took classes on how to care for their new baby; 67% did not.

85% knew where to go or where to call for Prenatal care (care for pregnant women).

With respect to goals from HP2020, survey respondents reported behaviors that exceeded most of the goals covered in the questionnaire (see Table below).

### HP2020: Childbirth related goals

HP2020 Goal	Goal	HD Pct.
Took multivitamins/folic acid prior to pregnancy	33.1%	94.2%
Abstain from cigarette smoking during pregnancy.	98.6%	94.2%
Abstain from alcohol (pregnant, 15 to 44 years) in the past 30 days.	98.3%	100.0%
Abstain from illicit drugs (pregnant, 15 to 44 years) in the past 30 days.	100%	100.0%
Prenatal care beginning in first trimester of females delivering a live birth.	77.9%	97.0%

### Children in Households

One in five (21.9%) households had children under the age of 18 living in the home, with an average of 2.1 children per household.

Of those with children, 34.4% had 1 child, 36.9% had two, and 19.1% had three children.

#### Check-ups, etc.

**Physical Exam.** Of those with children, 90.8% (2004, 80.2%) reported that their children had a physical within the past year.

About one in ten (8.5%) said their children did not have a checkup in the past year.

**Dental.** Of the children under 3, four of five (84.1%; 2004, 80.1%) saw a dentist during the past year; 14.8% (2004, 16%) did not.

**Immunization.** Nearly all of the children (96.8%) are up to date on their immunizations, a nearly identical response to the 2004 survey.

**Nutrition.** In those households with children, three in four children (81.2% 2004, 74%) living in the HD *always* eat at least three meals per day, and another one in eight (12.3%) *Often* do.

**Automotive Safety: Child Seats and Seatbelts.** Of 142 families with children under 6, 82% (76%, 2004) *always* use a child seat, while another 9.2% *often* use a child seat. Of households with children over age 6 (N=256), the *always* category for seat belt use increased to 67.6% (2004, 56.3%), while the *often* category was at 22.3% (2004, 29%).

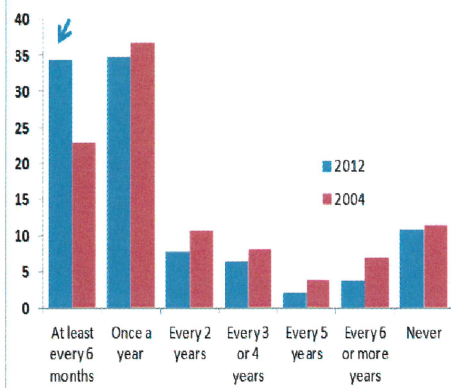

## Dental

**Results.** The proportion of adult residents (69%) who have visited the dentist within the past year is well ahead of the HP2020 Goal (49%). It is also an increase over the 2004 study in which 59% have visited the dentist within the past year.

Most of the children 3 and older (84%) have had a dental checkup within the past year, nearly double the HP2020 target.

### Dental Checkup: 2012 & 2004

## Insurance & Dental Checkups

### Dental Checkup x Insurance

Other Sources: CAN

- Two-thirds (66%) of respondents *Sometimes* (43%) or *Always* (23%) *delay seeing the dentist*.
- Half (50%) say that affordable dental care is a *somewhat/very serious problem* for the family.

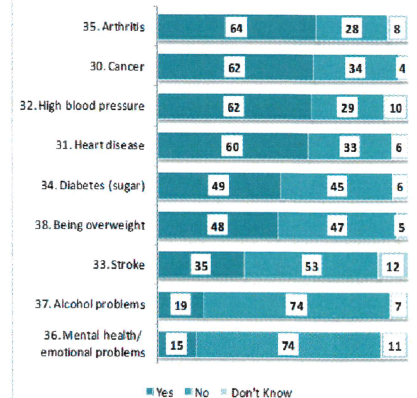

## Diagnoses by Health Professional

The survey included a series of questions reflecting the currency of diagnosed conditions (past 2 years). The most common of those was high blood pressure followed by high cholesterol, and overweight/obesity.

Diagnosis	Frequency	Pct	Diagnosis	Frequency	Pct
High blood pressure	503	33.7%	Skin cancer	76	5.1%
High cholesterol	459	30.8%	Colon or rectal cancer	13	0.9%
Arthritis	401	26.9%	Breast cancer	13	0.9%
Obesity /overweight*	280	18.8%	Lung cancer	6	0.4%
Thyroid problems	233	15.6%	HIV / AIDS	5	0.3%
Heart problems	180	12.1%	Cervical cancer	3	0.2%
Diabetes (sugar)	165	11.1%	Prostate	3	0.2%
None	143	9.6%	STDs	2	0.1%
Glaucoma	76	5.1%			

## Family History

### Knowledge of Family History

## Medication: Storage and Disposal

Overall, the kitchen and bathroom are the preferred storage place for medication.

### Where do you keep meds

## Medications (cont.)

One third of households (32%) keep prescription and OTC medications in a locked location.

Of those households that have at least one child, 42% keep OTC medications in a locked location.

Of those households that have at least one child, 41% keep prescription medications in a locked location.

### Medications Yes/No: Percent

### Disposing of medications (check all that apply)

### General Health Status

#### General Health Status

### General Health Status

#### Pct in Survey Days Health Not Good/Restricted Activities

Physical Health, 27% (N=364)

Mental Health, 18% (N= 249).

Restricted Activities, In the 2012 Survey, 14.9% (N=185) responded that their activities were limited because of health. In Nebraska, compare to 19% (BRFSS, 2010).

	Days Not Good/Limiting	Mean	For All	HD BRFSS
Physical Health		10.4	2.7	2.5
Mental Health		10.0	1.6	2.0
Restricted Activities		11.4	1.5	3.7

## 12.B COUNTY FOCUS GROUP MEETING NOTES

---

### NCDHD Community Health Improvement Planning

#### County Focus Group Meeting Notes – Summary of Corresponding Concerns

Comments from all county focus group meetings were reviewed to determine issues or concerns that came up in more than one location. Those concerns are captured in the list below. The following pages document all comments noted for each county focus group meeting.

#### **Chronic Disease, Obesity and Related Health Concerns**

- Education needed – prevention, nutrition, managing your chronic disease
- Diabetes concerns
  - Correlation between diabetes and heart disease, diabetes needs to be managed to prevent obesity or need for hospital care, lack of resources in place to assist with compliance
- School lunch concerns
  - Sometimes this is the only meal kids get, some kids don't eat at school, impact of school lunch regulations in relation to childhood obesity, there are calorie restrictions on school lunches

#### **Behavioral Health – Substance Abuse**

- Prescription drug abuse concerns
  - Significant need for electronic prescription medication database
- Elderly prescription concerns
  - Primarily attributed to education, medication management, or ability to take medications correctly
- Concerns with youth consumption of energy drinks
- Concerns with teen drinking or prescription drug abuse – learned behavior from parents or parental attitude/acceptance/environment does not serve to prevent
- Marijuana use increasing

#### **Behavioral Health – Mental Health**

- Access to care is most significant barrier – affordability, availability (lack of providers, facilities)
- Medication management or ability to afford medication leads to issues
- Emergency Protective Custody (EPC) issues
- Stigma prevents people from seeking care, especially in smaller communities
- Issues with being properly diagnosed

### **Access to Care**

- Struggle with getting new providers (medical/dental/mental health) to come to rural areas, lack of providers who accept Medicaid
- Care for seniors and youth seem to suffer in smaller communities due to lack of services
- Access to care is related to economic situation
  - Affordability of health care, affordability/availability of in-home or nursing home care for elderly, gap between being able to afford care/insurance and not qualifying for Medicaid/Medicare, resources need to be available during food pantry hours, need more information about resources and charity care / free services
- Transportation is a big concern
- Insurance concerns – premium affordability, less adequate coverage, effect of health care reform, Medicaid/Medicare difficult to obtain and funds being cut
- Lack of medication/prescription availability
- Dental concerns
  - Dental health affects all aspects of a person's health, lack of financial resources to pay for own dental care
- Senior care concerns
  - Financial burden is a big concern, lack of resources/services, population is aging

### **Cancer Prevention and Education**

- Focus is needed on education, awareness, and preventive measures

### **Environment and Safety**

- Concerns about healthy home environments
  - Family values and morals have changed, family situations are different, quality family time needs to be important, child abuse/neglect is an issue, no follow-up or response to reports of abuse/neglect, truancy issues related to home environment
- Concerns over level of safety in schools
- Internet gives youth access to everything
- Lack of safe, affordable housing

**County/Location:** Antelope / Neligh

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>n/a</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>Hospital does see some prescription drug abuse – need to have an electronic pharmacy registry to track when prescriptions are filled</li> <li>Prescription med abuse in the elderly – don't take their medications properly: AMH has a lunch bag program that they have used that people bring their medications in to the clinic</li> <li>Doesn't appear to be as much meth use as a few years ago</li> <li>Marijuana is the gateway to meth use</li> <li>Binge drinking is socially acceptable – parents do it so it is okay for their kids to do it</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>Many not able to get in to see counselors</li> <li>Not a lot of services for adolescents</li> <li>Have used Telehealth in the past for counseling services</li> <li>Many are not able to afford mental health services</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>Senior care is a burden on the health care system</li> <li>Seniors lack money and often don't get proper nutrition</li> <li>Not many places that provide services for the elderly and if they do they are very expensive and they can't afford it</li> <li>Many schools with limited school nursing hours – they are unable to provide education on nutrition, physical activity, etc.</li> <li>Dental care – unable to recruit new dentists</li> <li>Not as many dental issues associated with meth as seen in the past</li> <li>Hospital doesn't see a lot of people with dental issues</li> <li>10% of population in Neligh is Hispanic</li> <li>Not able to find interpreters in health care settings – they are very much in need</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>n/a</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>Family values and morals have changed – violence in video games, on TV and internet access to everything</li> <li>Training in schools for safety of staff and students</li> <li>Have a police officer in the school to interact with students, can notice students experiencing difficulties and intervene (in the Norfolk high school at this time)</li> <li>Lack of parental supervision, confusing family situations</li> <li>No responsibility for parents to care for their children, a lot of co-dependency</li> <li>Need major focus on children – able to change behaviors in young children</li> <li>Elder abuse seen- they don't receive proper care, some families keep elderly at home to save money and others don't want the elderly in a nursing home and try to care for them on their own</li> </ul>

County/Location: Antelope / Tilden

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>• Nutrition – many kids without breakfast and supper</li> <li>• School requires student to have a fruit and a vegetable for their meals – kids aren't eating them and there is a lot of waste</li> <li>• Calorie restrictions on amount of food served in schools</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>• Occurs in many households</li> <li>• Alcohol usage in schools has remained about the same over the past 20 years</li> <li>• Increase in usage of marijuana</li> <li>• Prescription drug abuse seen more in adults – kids have prescriptions that they aren't taking because parents are taking them instead</li> <li>• Youth drinking too many energy drinks although has seemed to decrease over past year</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>• Have protocols and crisis response teams for school emergencies/tragedies</li> <li>• Lack of providers and mental health facilities</li> <li>• More mental health services for those directly involved in tragedies – how to get them the help they need</li> <li>• Need mental, physical and spiritual health for everyone, if one part of the three is missing the person is not whole</li> <li>• Spirituality is often taken out of things because it is offensive to some people</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>• Not enough providers – new providers typically don't come to rural areas</li> <li>• Youth with Medicaid are not able to access treatment</li> <li>• Many providers do not accept Medicaid</li> <li>• Lack of financial resources in families to pay for own dental care</li> <li>• Dental health affects all aspects of a person's life and health systems</li> <li>• Senior care services – they had a 45 bed nursing home that had to be closed</li> <li>• Have many resources: new assisted living facility, clinics, hospital, hospice and counseling services</li> <li>• Seniors have limited financial resources</li> <li>• Home health – staff are extended and business comes in spurts</li> <li>• Some seniors can't afford assisted living or care in homes</li> <li>• Difficult to find 24 hour care for seniors in their homes</li> <li>• Need to look to the future in regards to senior care and be more creative on how to handle growing population of seniors</li> <li>• Baby boomers are reaching senior ages soon and there is not adequate health care systems in place to handle the large increase in the senior population</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>• More education needs to be done</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>• School safety: are the schools really safe and what needs to be done in order to ensure the safety of the students and staff</li> <li>• Have first responders visit the schools so they are familiar with the layout of the school</li> <li>• Have a "safe place" designated in each school where the students and staff can go</li> <li>• Should a school staff member be allowed to have a concealed weapon in the school (training for how to respond to an incident)</li> <li>• Schools should have drills and have crisis response teams</li> <li>• Law enforcement present at all schools in mornings and periodically throughout the day</li> <li>• ID badging for school staff</li> <li>• Internet access – able to access all types of information</li> <li>• Family units/community togetherness – how to keep them together, values and morals have changed, we have a sense of "protection" that nothing bad will happen here</li> </ul>

County/Location: Boyd / Spencer

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>• Diabetes and heart disease – need to have educational programs for the public</li> <li>• Seem to have active people in community in regards to physical activity, especially younger women</li> <li>• Weight room at the school in Spencer is open to the public</li> <li>• More education needed on diet &amp; nutrition – food preparation, recipes, how to eat right</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>• Don't feel there is much prescription drug abuse</li> <li>• Canine units in schools may be good – where is the closest one located, bring it into schools for monthly checks to scare the kids into knowing that they will get caught</li> <li>• See a lot of people that use chewing tobacco</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>• Difficult to find someone to help those who are in need</li> <li>• No mental health providers within the county</li> <li>• No psychiatrists around, usually only come for medication checks</li> <li>• Many people don't want to seek mental health services because of the stigma associated with this – small communities and people will see them and talk</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>• Smaller communities don't have as many services to offer – senior care and youth</li> <li>• Only 1 dentist in Boyd County, he is 70 years old and may not be taking any new patients – unable to recruit any new person to take his place</li> <li>• Location has been a hindrance for recruitment of dentists, physicians, etc.</li> <li>• Not many physicians, many are older and close to retirement</li> <li>• Need to promote health care fields in schools at career fairs, etc., maybe using telehealth</li> <li>• Access to care is difficult – need to have more free services available for communities</li> <li>• Many seniors need more care than they are receiving and there are not many services available to provide them with assistance</li> <li>• Have 1 nursing home and 2 assisted living facilities in Boyd County</li> <li>• There have been funding cuts to the Nebraska Area Agency on Aging</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>• Niobrara Valley Hospital looking to find new ways to promote colorectal cancer screening</li> <li>• Niobrara Valley Hospital conducted free prostate screening, will be done again in March or April</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>• Niobrara Valley Hospital is looking at implementing a bike helmet program and child safety seat checks</li> <li>• Some dilapidated buildings – communities are doing much better at taking care of this matter – city council has worked on this in Spencer</li> <li>• Lynch has a movie theater ran by local volunteers.</li> <li>• A lot of people in the area volunteer for many things, they are becoming extended and it is hard to implement any new activities.</li> <li>• A lot of community pride in keeping things nice.</li> </ul>

**County/Location:** Brown / Ainsworth

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>• Childhood obesity as related to school lunch regulations</li> <li>• Increase of childhood obesity</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>• Need electronic database for prescription drugs</li> <li>• Marijuana use is increasing</li> <li>• Steroid use among youth</li> <li>• Use of energy drinks by youth</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>• Identification of diagnosis</li> <li>• Resources not available or accessible. Transportation big issue</li> <li>• Access to care</li> <li>• Cost</li> <li>• Stigma</li> <li>• Waiting lists for care</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>• How does health care reform affect services</li> <li>• Shortage of some drugs</li> <li>• Oral health accessibility</li> <li>• Lack of fluoridation</li> <li>• Local Alzheimer's unit closed</li> <li>• Need for monitoring of seniors</li> <li>• Insurance-higher deductibles and less adequate coverage</li> <li>• Many people do not know about Charity Care or do not follow through</li> <li>• Do not have baselines concerning men's health</li> <li>• Need for more specialty physicians</li> <li>• Need breastfeeding and lactation support</li> <li>• No birthing facilities- must travel for prenatal classes</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>• n/a</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>• Internet safety</li> <li>• Physical safety at school, in hospital and businesses</li> <li>• Child abuse &amp; neglect- unresponsive resources, increasing issues</li> <li>• Decent, affordable housing not available</li> <li>• Substandard housing- lead, mold and radon</li> </ul>

**County/Location:** Cherry / Valentine

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>Dietary services only covered for diabetics and kidney disease</li> <li>Preventative education needed</li> <li>Obesity &amp; tobacco can be tied to most chronic disease</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>Alcohol, prescription drugs, abuse of household products, huffing, Lysol, etc.</li> <li>Prescription abuse is primarily from youth to middle age</li> <li>Elderly abuse is related to medication management and understanding</li> <li>Theft of prescription pads</li> <li>People going to multiple providers</li> <li>Not going away</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>Management issues</li> <li>Economics- insurance/ preventative coverage</li> <li>Need more providers</li> <li>EPCs often don't get admitted</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>Charity Care at hospitals going up</li> <li>Health insurance premiums are a barrier</li> <li>Stereotyping barriers keeps people from seeking care</li> <li>Access to care is related to poverty, especially emergency services</li> <li>Dental care- few providers</li> <li>Dental status is related to other health issues</li> <li>Many dental providers will not take Medicaid clients</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>n/a</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>Increased truck traffic</li> <li>Child restraints</li> <li>Bike helmets</li> <li>Gun safety- is education taking place?</li> <li>Housing- finding affordable housing</li> <li>Substandard housing</li> <li>Landlords not safety conscious</li> <li>Native American issues: substance abuse, domestic violence, health issues, abuse of system, chronic disease- diabetes, cirrhosis of liver, health system complicated, detox &amp; treatment issues, demographics in schools changing</li> </ul>

County/Location: Holt / O'Neill

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>• Diabetes is a huge problem we are forgetting.</li> <li>• Diabetics need to keep up on their routine doctor checks so they do not end up needing hospital care.</li> <li>• Diabetics are also a big population that has cardiovascular problems.</li> <li>• Keeping up on healthy choices so they do not become obese.</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>• Prescription Drug (PD) use is a big problem in our district.</li> <li>• PD is very easy to get ahold of.</li> <li>• Most elderly have an array of prescription drugs they take every day.</li> <li>• Alcohol continues to be the #1 problem.</li> <li>• Teen drinking is a problem</li> <li>• The parent's perspective of drinking and how they portray it.</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>• Can't afford health care so stop taking medication and end up going into Emergency Protective Custody (EPC) as a cause of it.</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>• Growing population of elderly - 65% of our district is elderly.</li> <li>• Medicaid availability for elderly in nursing homes.</li> <li>• Affordable care/insurance for elderly in nursing homes.</li> <li>• Medication management</li> <li>• A lot of people don't know how to access affordable health care.</li> <li>• Rural areas do not have free service facilities so people do not think it is an option.</li> <li>• 65 and older people lose jobs but cannot qualify for Medicaid and can't afford to live on having a part-time job.</li> <li>• Need a list of available resources, create a resource book.</li> <li>• Low paying jobs in our area, people can't afford care or to live here.</li> <li>• Have resources available during food pantry hours.</li> <li>• Using Economic Development as a resource.</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>• Putting off preventive care until it's too late.</li> <li>• Hospitals are doing a great job at promoting colon screenings.</li> <li>• Providing more checks/screenings during health fairs.</li> <li>• Providing services during food pantry hours.</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>• Home life stability, how that affects everything.</li> <li>• Children are not able to be home enough, involved in lots of activities, which is good, but less time is spent around the supper table as a family.</li> <li>• Housing owners do not want to enforce healthy environments.</li> <li>• Demolition of old abandoned houses that could be bad for one's health.</li> <li>• Elderly being stuck in their homes not knowing about the resources available to them. Unhealthy environment.</li> <li>• Rural youth work more jobs than urban youth.</li> </ul>

**County/Location:**

Knox / Creighton

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>Those with chronic disease need more assistance, have difficulty navigating health care system</li> <li>Many fall through the cracks</li> <li>Tend to be non-compliant at home and many times have inpatient stays due to this</li> <li>Health literacy is an issue – have been using the teach back method where patient states three things to ensure that learning has occurred; also use demonstration of skills</li> <li>Santee has a large number of diabetics with specific diets that need to be followed– lack of fresh healthy foods available, the grocery store there doesn't have fresh produce, etc. and many times the residents are not able to afford driving to other communities to purchase these food items so there is a lot of noncompliance with their diets – they are looking into "Street Farmer" to show them how to grow their own fruits and vegetables</li> <li>Some current issues with teens not eating in the schools</li> <li>Nutrition in schools – an increase in students bringing their lunches, smaller portion sizes</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>Teen drinking is a problem</li> <li>Boredom for teens, lack of activities for them to participate in other than sports</li> <li>Parents accept teen drinking in this area (parents did it so okay for their teens to drink)</li> <li>Energy drinks (some contain alcohol) – Knox County Extension Office has a display regarding energy drinks – some communities have age limit on purchase (18 years and older)</li> <li>Need Pharmacy Database so pharmacists can see when prescription medication was last refilled</li> <li>Prescription drug abuse occurring in adults and teens - appears to be enabled by parents (parents take grandma's pills so they in turn take their parents' medications)</li> <li>Patients go to many different facilities to seek prescriptions (typically for pain)</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>Only one mental health provider that offers home visits in the county</li> <li>Lack of access</li> <li>Use telehealth to address lack of access</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>Lack of access to dental providers who accept Medicaid</li> <li>Lack of access to dental screening</li> <li>On-line training course to learn how to apply fluoride varnish, provides a certificate, does not need to be a dental hygienist or dentist</li> <li>Staffing shortages in long-term care (CNAs and nurses) leads to lack in continuity of care</li> <li>Abuse of the health care system – people are using the ER instead of waiting to see a provider during normal hours, mainly those with Medicaid</li> <li>No urgent care available</li> <li>Avera Creighton Hospital has an after hospitalization program called "Care Transitions" – the nurse completes a home visit and does a medication check to help with compliance, and make follow-up phone calls with the patient</li> <li>There are many restrictions for home health coverage, if person is not homebound, they have to pay privately for the care</li> <li>Many with chronic disease or elderly need assistance with daily chores</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>People without health care plans don't see providers for screenings and checkups, so there is a lack of education about what screenings are needed and at what ages they should be done</li> <li>For those without health care plans the screenings are cost prohibitive</li> <li>Avera Creighton had a mobile mammogram unit – did not have as many people utilize this service as they were expecting</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>Children not in healthy home environments – they are reported to the state according to protocol and follow the chain of command but nothing seems to get accomplished</li> <li>Lack of resources for follow-ups listed above or no follow through</li> <li>Not a lot of foster care homes available in the area</li> <li>Lack of juvenile services available (detention centers)</li> <li>Bullying by both adults and children</li> <li>Truancy issues (particularly in Santee), parents don't enforce their children's attendance in school – this leads to an increase in the opportunity for teens to engage in high risk behaviors</li> </ul>

County/Location: Pierce / Foster

Focus Area		Notes
<b>Chronic Disease, Obesity and Related Health Concerns</b>		<ul style="list-style-type: none"> <li>• Diabetes is a factor in some cases of obesity.</li> <li>• Cardiovascular disease has decreased since smoking has been banned in bars.</li> <li>• Great that school lunch programs are reducing bad food, but now more kids bring lunch from home or go off campus to eat.</li> </ul>
<b>Behavioral Health</b>	<b>Substance Abuse</b>	<ul style="list-style-type: none"> <li>• Medical marijuana use is increasing.</li> <li>• Fear of it only being a matter of time before marijuana becomes legalized in more states.</li> <li>• Increase of prescription drug use.</li> <li>• Having more safe ways to take back prescription drugs.</li> <li>• Youth binge drinking will continue to be a problem.</li> </ul>
	<b>Mental Health</b>	<ul style="list-style-type: none"> <li>• People need to be treated, but it's hard to get in and see someone who can actually diagnose a mental illness.</li> <li>• Getting kids into a mental health program, and not knowing where to take them.</li> <li>• People don't think it's a big deal until it's too late.</li> <li>• EPC issues, where they take them and how long they can be kept.</li> </ul>
<b>Access to Care</b>		<ul style="list-style-type: none"> <li>• Finding where to go for children with mental health issues.</li> <li>• One of the problems could be that mental health provider jobs are being cut.</li> <li>• Making sure people show up for meetings and together try to get information out there.</li> <li>• Region 4 contracting with the hospitals is a good way to help spread information.</li> <li>• Medicaid and Medicare funding will be getting cut.</li> <li>• Some agencies cover such large areas and are strung out too thin.</li> <li>• Affordable nursing home care for our elderly.</li> <li>• 75% of the dentists in our district will be retiring soon.</li> <li>• The Hispanic populations in our area have difficulty finding oral health care.</li> <li>• Affordable dental insurance.</li> <li>• A gap of people who are being missed, those who can't afford dental care, but don't qualify for Medicaid or Medicare.</li> <li>• Pharmaceutical availability.</li> <li>• The delay when getting prescription drugs. There are so many drugs it's hard for pharmacists to keep them all in stock.</li> <li>• Medicaid is very difficult to get now.</li> <li>• Can't afford to have in home care for elderly and it is hard to find someone who will do it privately due to liability issues.</li> <li>• Nursing homes are having an overflow.</li> <li>• Can't afford to have health care.</li> <li>• Elderly having to give everything they own to afford to be taken care of in a nursing home.</li> </ul>
<b>Cancer Prevention and Education</b>		<ul style="list-style-type: none"> <li>• Believe it is helping that FOBT kits are being handed out so much more, especially at health fairs.</li> </ul>
<b>Environment and Safety</b>		<ul style="list-style-type: none"> <li>• Economic development.</li> <li>• The family structure. Sitting down as a family and having a meal.</li> <li>• School safety.</li> <li>• Has been helping since smoking was banned in bars.</li> </ul>

**County/Location:** Rock / Bassett

Focus Area		Notes
